Customs Brokerage Services

We are ahead of the curve on the latest customs programs - such as remote filing services and entry reconciliation - to help you keep your business on the leading edge.

In fact, we continuously work to impact trade policy through active participation in industry committees and associations.

Customs are increasing their focus on compliance audits. Despite the challenge of a continually evolving regulatory environment, setting up and maintaining a compliant trade program is critical. Not only will goods continue to flow to your customers, but you also reduce the risk of financial penalties and escalating fines. Reliable customs compliance will elevate your reputation with authorities, leading to fewer border delays and better access to customs' programs.

Duty rates, customs clearance, and entry processes differ from country to country. Tariff classifications, value declaration, and duty management can create confusion and increase costs. And customs and security initiatives have imposed new regulations on companies that make it more challenging than ever to trade internationally.

Post-entry Audit Service

Our post-entry audit service will help ensure accurate transaction records support your claims regarding tariff classification, valuation and origin determination.

When we identify areas of non-compliance, we'll offer you practical solutions to correct it and improve your compliance efforts.

ISF 10 + 2
File Quickly and Easily

We are ready to help

Our customer service programs enable online visibility to entry, delivery, tracking and billing details, and offer flexible reporting capabilities

Flexible EDI solutions help minimize data entry errors which can impede your shipment's progress. Implementation procedures for new customers include the development of an import process to maximize your chances of being categorized as "low risk" and further minimize costs.

Our document imaging provides easy archiving and retrieval of important customs brokerage documents and minimizes the need for physical storage space.

Standardized entry processing and customer service can increase compliance, consistency, quality, and ease of doing business.

As a C-TPAT and AMS certified provider, our security measures meet or exceed the latest requirements established by U.S. Customs and Border Protection.
